MedKnit

Medkeeper

Medkeeper is a "system of care" consisting of physical packaging and digital app to support compliance of special medicines.

Dependent of who is using the physical product or digital app, the intended of the product is to be a medication reminder, a medication tracker, a medication organiser for multiple medications, medication alert system, or medication 1 of pharmacy kit, case health records and medicines (not in scope) case.

Stakeholder Interview

Stakeholder interviews were conducted to obtain Input from key individuals/organisations to ensure that the models being developed effectively solves the situation it holds. We were keen to ensure the ideas solely from concerning material medicines.
